FULL-STACK & REACT NATIVE DEVELOPER

JOSEPH KAKKASSERY

Building fast, scalable web & mobile applications — from schema design to shipped product. Based in Hyderabad, India.

+91 93970 82746 | joseph101kt@gmail.com | github | linkedin | Portfolio

ABOUT

Full-stack and React Native developer who ships production applications for real clients — not just side projects. Built and deployed cross-platform mobile apps, multi-tenant web backends, and AI-powered features using Next.js, React Native (Expo), Supabase, FastAPI, and the Gemini API. Comfortable owning the full stack: schema design, REST APIs, real-time systems, mobile UI, and deployment. Looking to bring that execution speed into an AI-native engineering team.

TOOLBOX

SKILLS

FRONTEND	Next.js 14, React Native, TypeScript, Tailwind CSS, NativeWind, Vite
BACKEND	Supabase, FastAPI, PostgreSQL, Node.js, Express, MongoDB, Django
MOBILE	React Expo, Flutter, Android Studio
OTHER	Gemini API, LiveKit WebRTC, Cloudinary, Git, REST API Design, SEO

EXPERIENCE

ROLES I HAVE TAKEN ON

Aug 2025 - Jan 2026

Next.js | Supabase | Cloudinary | PostgreSQL

Full-Stack Web Developer

SBMS — South India Bridal Makeover Studio

- Designed, built, and deployed three production sites end-to-end with no senior oversight — sbmsacademy.in, simabeautyexpo.com and beyondbeautynetwork.in .
- Owned the full event-registration pipeline: image upload → Cloudinary → instant PDF ticket → personalised email, live at real events.
- Built a reusable ticket/ID generator so non-technical staff could produce materials without a developer.
- Shipped internal dashboards for attendee management and event administration.

Jun 2026 – Present

Full-Stack Web App Developer

Nazaria Collective

Architecting a full LMS for a youth mentorship nonprofit — 4 roles, a 22-table schema with RLS, real-time chat, Google Meet scheduling, and a PRD used to onboard stakeholders.

Next.js 14 · Supabase · Gemini API · PostgreSQL

May 2026 – June 2026

Full-Stack Mobile Developer

Raithan — Agri Marketplace

Scoped a maintenance contract into a full backend rebuild — PostGIS-based farmer-vendor matching, fixed a broken production seeder script.

Flutter · Supabase · PostGIS

Retail client

Product Catalogue

Anugraha Christian World

Product showcase for a real retail client (also worked there in-store), with slug routing, URL-driven filters, and a CRUD admin panel.

Next.js · Cloudinary · Live Website

SIDE PROJECTS

BUILT FOR CURIOSITY

Full-Stack Job Portal — FAVORITE

React Native · Expo Router · Supabase · Gemini API · LiveKit · Live Link

- Supabase-powered backend: JWT auth, relational DB with full CRUD, and real-time chat via Supabase Realtime.
- AI resume parser combining Tesseract.js OCR, Mammoth DOCX extraction, and Gemini API — fully automatic candidate structuring.
- Integrated LiveKit Cloud for in-app live video interviews over WebRTC with camera/mic controls.

MERN Mongo Visualizer

Recursive React components render infinitely nested JSON. Full REST API from scratch; Mongoose schemas enforce validation in a schema-less environment.

MongoDB · Express · React · Live App

Slimes vs Sorcerers

Created a feature-complete Lua/LÖVE2D action game with fluid combat, modular enemy objects, adaptive wave spawning, pathfinding, polished UI, and collectible health/XP loot systems.

Lua · Love2D · Demo video

Education

Government City College, Hyderabad — 2023–26
B.Sc. Computer Science

St. Mary's Centenary Jr. College — 2021–23
Intermediate (BiPC) — 914/1000

St. Francis De Sales High School — 2012–21
SSC — 10/10 GPA

Certifications

CS50x · CS50P · CS50 SQL · Google Digital Marketing · Google Ads Measurement · HubSpot SEO · Paid Ads
