Portfolio: josephkportfolio.netlify.app GitHub: github.com/joseph101kt LinkedIn: linkedin.com/in/joseph-kakkassery

Full-Stack Developer with hands-on experience shipping production applications for real clients — event platforms, multi-tenant backends, and real-time systems built with Next.js, React Native, and Supabase. CS graduate who works independently, moves fast, and writes code that actually gets deployed and used.

SKILLS

Frontend: React, React Native, Expo Router, Next.js, NativeWind, Tailwind CSS, Vite, Vue.js, Angular.js

Backend: Node.js, Express, MongoDB (Mongoose), Supabase, PostgreSQL, SQLite3, Django

Languages and Tools: JavaScript, TypeScript, Python, Lua, Git, GitHub, VS Code, Android Studio, Postman

Other: Gemini API, Tesseract.js (OCR), Mammoth.js, SEO, Polyglot(English, Hindi, Telugu, Malayalam)

EXPERIENCE

Web Developer · SBMS — South India Bridal Makeover Studio

Aug 2025 – Jan 2026

- Designed, developed, and deployed two production websites using Next.js and Supabase serving academy and event-management workflows — sbmsacademy.in and simabeautyexpo.com
- Developed a full event-registration pipeline: image upload to Cloudinary → instant PDF ticket/ID generation → personalised email delivery
- Created a reusable ticket/ID template generator to let staff produce customised materials without developer involvement
- Developed internal operations dashboards for attendee management, onboarding automation, and event administration.

PROJECTS

Full-Stack Job Portal — React Native (Expo Router), Supabase, Gemini, LiveKit

- Cross-platform app (web + Android) built with Expo Router in a monorepo structure, deployed to Vercel
- AI resume parser combining Tesseract.js (OCR for images), Mammoth (DOCX extraction), and Gemini API to structure candidate data automatically
- Integrated LiveKit Cloud for in-app live video interviews using WebRTC with camera/mic controls
- Responsive UI with NativeWind/Tailwind; shared Supabase package across workspace apps
- Link to the project: joseph-k-mobile.expo.app

MERN MongoDB Document Visualizer — MongoDB, Express, React, Node.js, Tailwind

- Architected a specialized data management tool to bridge the gap between raw MongoDB collections and intuitive UI management.
- Recursive UI Logic: Engineered recursive React components to visualize infinitely nested JSON data structures dynamically.
- Custom REST API: Developed a full suite of GET, POST, PATCH, and DELETE endpoints from scratch using Express and Node.js.
- Data Integrity: Implemented Mongoose schemas to enforce strict data validation within a schema-less NoSQL environment.
- Live App: <https://mern-stack-mongodb-database-visualize.netlify.app/>

Slimes vs Sorcerers (2D Game) — Lua, Love2D

- Built a 2D game from scratch including state handling, tween-based animations, and custom collisions.
- Scripted polymorphic enemy behavior tracking 5 distinct elemental status-effects.
- Implemented point-based wave progression, loot-drop mechanics, and basic enemy pathfinding.

EDUCATION

B.Sc. — Computer Science - Government City College, Hyderabad | 2023 – 2026

CERTIFICATIONS

- Harvard — CS50x, CS50P, CS50SQL
- Google — Fundamentals of Digital Marketing, Ads Measurement | Hubspot — SEO Certification
- Udemy — 11 platforms in 1 course: Learn Paid Advertising
